HOW TO REPLACE THE BATTERY

1. Check the type of back cover

Screw-in type	Screwed type	Snap-on type(A)	Snap-on type(B)	Snap-on type(C)
				

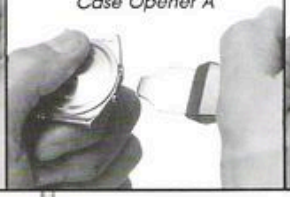
2. Removing the back cover

With the Adjustable Case Opener, turn the back cover counter-clockwise.

Using a screwdriver, remove the screws from the back cover.

Protect the back cover with a piece of tape before removing. Insert Opener A in the recess and move from side to side to make a gap between the cover and the case. Then use the opener to pry off the cover.

Case Opener A



Fit Case Opener B into the notch and pry open the back cover.

Case Opener B

Insert Opener B into a gap between the two hooks, and pry open the back cover.

**Avoid inserting the case opener at the hook position, or the case may be damaged.*

Case Opener B

3. Replacing the battery

Using a screwdriver, remove screw(s) from the battery holder.
Replace dead battery(s) and attach the battery holder.

Avoid touching the contact (−) of the battery.

Never hold the contacts with metallic tweezers.

4. AC (ALL CLEAR)

As shown below, touch the AC contact and the battery (+) side with metallic tweezers.
Contact should be about 2 seconds.

IMPORTANT

a) Contacting AC (ALL CLEAR) is necessary, when a new battery has been put in, because the memories/counters may cause erratic displays.

b) On some models, pushing the light button will turn on the display.

5. Fitting the back cover

Using the Adjustable Case Opener, tighten the back cover.

Tighten the screws, using a screwdriver.

Place the watch on a hand press and push the back cover in gently.

Hold the watch horizontally and snap-fit the back cover.

DEGREE OF WATER RESISTANCE
CASIO QUARTZ WATCHES

Please familiarize yourself with the correct applications, so that you can recommend the most suitable watch for your customers' needs.

CASE DESIGNATION	EXAMPLES OF USE	
	SUITABLE	UNSUITABLE
WATER RESISTANCE	 *Wearable while water is being splashed but not under any pressure.*	
50M WATER RESISTANCE	 *Wearable around sinks, during athletic sports, in shallow waters, but not while scuba or professional diving.*	
100M WATER RESISTANCE	 *Wearable around sinks, during swimming athletic sports, poolside diving, but not highboard diving and surfing.*	
200M / 300M WATER RESISTANCE	 *Wearable while scuba diving at depths not requiring helium gas.*	

*50M WATER RESISTANT casing models do not permit underwater button operations.
**100M WATER RESISTANT casing models permit underwater button operations except where buttons are countersunk. Should the watch be exposed to sea water, wash it well with clean fresh water and wipe dry.
***Avoid button operations when soap or shampoo bubbles on the watch case. (Water-resistance may be impaired.)
****The watch will withstand the ingress of water at a static pressure as indicated, i.e. 50 meters, 100 meters or equivalent to immersion in sea water at the stated depths. However, when performing any underwater activity, the dynamic pressure generated through movement is greater than the static pressure.
