

PULSAR

ANALOGUE WATCHES

HOW TO USE THE WATCH

■ SCREW DOWN CROWN [for models with screw down crown]

Unlocking the crown

- 1 Turn Crown counterclockwise until you no longer feel the threads turning.
- 2 Crown can be pulled out.

Locking the crown

- 1 Push Crown back in to normal position.
- 2 Turn Crown clockwise while pressing it lightly until tight.

* **When using the watch in water:**

*Before using the watch in water, be sure the crown is screwed in completely.
Do not operate the crown when the watch is wet or in water.*

ENGLISH

■ HOW TO START THE MECHANICAL WATCH (Cal. Y621)

To initially start your watch, swing it from side to side in a horizontal arc for about 30 seconds.

** If the watch is worn daily, PULSAR's automatic mechanism will wind the mainspring automatically through normal wrist movement.*

■ TIME SETTING FOR MODELS WITHOUT CALENDAR

CROWN

- 1 Pull out.
- 2 Turn to set the time.
- 3 Push back.

■ TIME/CALENDAR SETTING FOR MODELS WITH DATE CALENDAR

CROWN

- 1 Pull out to the first click.
- 2 Turn to show the previous day's date.
- 3 Pull out to the second click.

- 4 Turn until the desired date appears.

** Turn Crown to advance Hour and Minute hands.*

- 5 Turn to set the time.
- 6 Push back in to normal position.

■ TIME/CALENDAR SETTING FOR MODELS WITH DAY AND DATE CALENDAR

CROWN

- 1 Pull out to the first click.
- 2 Turn to show the previous day's date.
- 3 Turn in the opposite direction to show the previous day of the week.
For Cal. PC33, turn clockwise to set the date only.
- 4 Pull out to the second click.
- 5 Turn until the desired date and day appears.
- 6 Turn to set the time.
- 7 Push back in to normal position.

** Turn Crown to advance Hour and Minute hands.*

Notes on time setting:

- 1 When setting Minute hand of a quartz watch, advance it a few minutes ahead and then turn it back to the exact time.
- 2 If your watch has three hands, pull out Crown all the way when Second hand points at 12 o'clock. After adjusting the time, push Crown back in to normal position in accordance with a time signal for "00" seconds.

Notes on calendar setting:

- 1 The date will change gradually between 9:00 P.M. and 4:00 A.M. Therefore, do not change the calendar during this time period. Otherwise, it may not change properly. If it is necessary to set the calendar during that time period, first change the time to any time outside it, set the calendar and then reset the correct time.
- 2 If your watch has a bilingual day calendar, choose the desired language. When the day shifts automatically to the next day, the other language will appear temporarily.
- 3 When setting the hour hand, check that AM/PM is correctly set.
The watch is so designed that the calendar changes once in 24 hours.
Turn the hands past the 12 o'clock marker to determine whether the time is set for the A.M. or P.M. period. If the calendar changes, the time is set for the A.M. period. If it does not change, the time is set for the P.M. period.

Day setting for Cal. PC33

At the second click position, turn the hands clockwise and counter-clockwise repeatedly between 11:15 p.m. and 3:45 a.m. to select the desired day and language.

BATTERY CHANGE OF ANALOGUE QUARTZ WATCH

- As the battery is inserted at the factory to check the function and performance of the watch, its actual life once in your possession may be less than the specified period.
- When the battery expires, be sure to replace it as soon as possible to prevent any malfunction.
- We recommend that you contact an AUTHORIZED PULSAR DEALER for battery replacement.

**WARNING**

- Do not remove the battery from the watch.
- If it is necessary to take out the battery, keep it out of the reach of children. If a child swallows it, consult a doctor immediately.
- Never short-circuit, tamper with or heat the battery, and never expose it to fire. The battery may burst, become very hot or catch fire.

**CAUTION**

- The battery is not rechargeable. Never attempt to recharge it, as this may cause battery leakage or damage to the battery.

LOSS / GAIN OF ANALOGUE QUARTZ WATCH

- Loss/gain (monthly rate) is less than 15 seconds (20 seconds for some calibres) at normal temperature range (5°C ~ 35°C)(41°F ~ 95°F).

TO PRESERVE THE QUALITY OF YOUR WATCH**WATER RESISTANCE**● **Non-water resistant**

If "WATER RESISTANT" is not inscribed on the case back, your watch is not water resistant, and care should be taken not to get it wet as water may damage the movement. If the watch becomes wet, we suggest that you have it checked by an AUTHORIZED PULSAR DEALER or SERVICE CENTER.

● **Water resistance (3 bar)**

If "WATER RESISTANT" is inscribed on the case back, your watch is designed and manufactured to withstand up to 3 bar, such as accidental contact with splashes of water or rain, but it is not designed for swimming or diving.

● **Water resistance (5 bar)***

If "WATER RESISTANT 5 BAR" is inscribed on the case back, your watch is designed and manufactured to withstand up to 5 bar and is suitable for swimming, yachting and taking a shower.

● **Water resistance (10 bar/15 bar/20 bar)***

If "WATER RESISTANT 10 BAR", "WATER RESISTANT 15 BAR" or "WATER RESISTANT 20 BAR" is inscribed on the case back, your watch is designed and manufactured to withstand up to 10 bar/15 bar/20 bar and is suitable for taking a bath, shallow diving, but not for scuba diving. We recommend that you wear a PULSAR Diver's watch for scuba diving.
