HOW TO STOP THE ALARM RINGING

Any depression of button "A", "B", "C" or "D" will stop the sound of melody alarm.

ALARM TEST

In time display, depress buttons "B" and "C" at the same time. The melody alarm will ring while depressing the buttons.

- * By depressing buttons "B" and "C" at the same time, the alarm and time signal are set or reset alternately.

REMARKS FOR PARTICULAR DISPLAY

In time/calendar setting, if the buttons "B" and "C" are depressed at the same time, the pattern 1 will be displayed, and if depressed twice, pattern 2 will be displayed. These displays will be used at a watch retailer to make adjustment, so depress button "A" to show normal display.

Pattern 1

Pattern 2

BATTERY CHANGE

BATTERY LIFE

A new battery will last approximately three years.

- The battery in your watch is the monitor battery to check the functions of the watch. As it is inserted at the factory, the battery life may be less than three years.

BATTERY CHANGE

Be sure to have the battery replaced by an ALBA DEALER. A dim illuminating light or a dim display in normal temperatures indicates that the battery life nears its end. We recommend the battery be replaced with a new one. If an old battery is kept in the watch for a long time, electrolyte leakage from the battery may damage the module.

- When the battery is replaced, please specify "ALBA BATTERY".
- The battery installed in the watch is for monitoring purposes and is not included in the price of the watch.
- The replacement of the battery is, therefore, changeable, even within the guarantee period of the watch.
- When a battery is taken out of a watch, it must be kept at a place beyond the reach of an infant. In case it is swallowed by an infant, consult a doctor immediately.
