

① This multi-functional digital watch with a compact and smart design will appeal to everyone.

② Easy-to-see time screen. "Hour", "minute" and "second" are always displayed on the time screen.

③ The liquid crystal panel of this watch has an especially long life, along with excellent contrast.

⑦ A high-frequency quartz crystal oscillator and temperature compensation circuit together provide a stable, high accuracy for a wide range of temperatures. The accuracy is less than  $\pm 10$  sec. per month.

⑧ One small-size silver oxide power-cell ensures highly accurate operation for two years.

Voltage: 1.5V

Parts No.: 280-21 (UCC-386)

④ The illumination lamp provides easy reading of the digital display even in the dark.

⑤ The world's first electronic alarm will never fail to remind you of an appointment.

⑥ "Time" and "0-second reset" can easily be performed by the push-operation of the two buttons.

⑨ Time adjustment is very easy due to the trimer condenser (regulator). Please adjust the time while operating the quartz timer.

⑩ The coil for buzzer sounds softly every second for one minute.

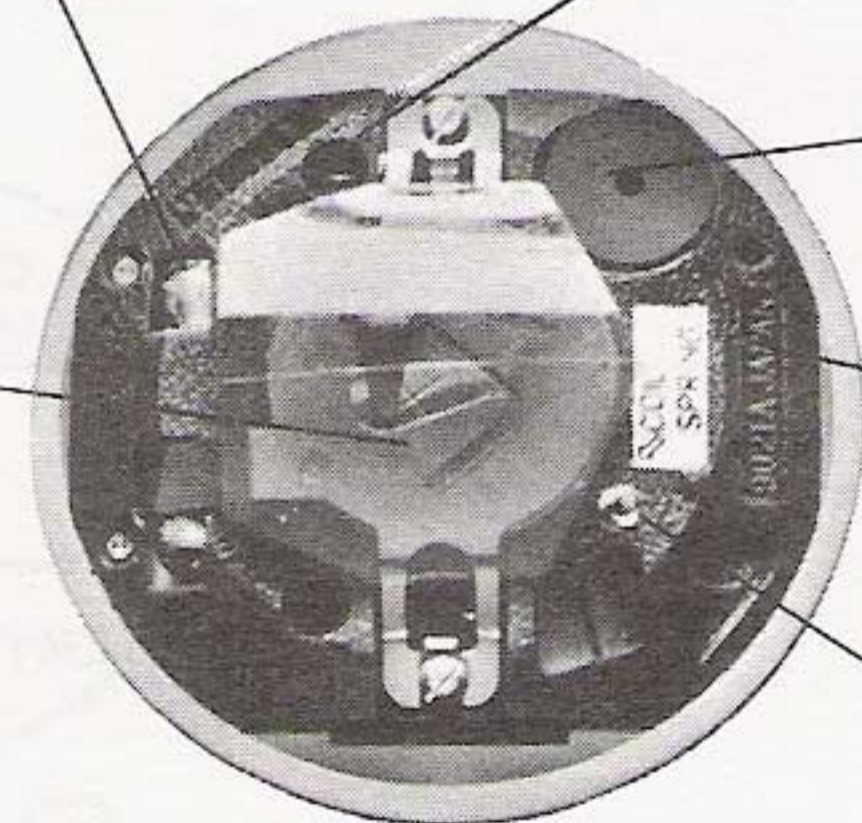

⑪ C/MOS-LSI assembled into one chip provides a stable high-performance forever.

⑫ The movement is compactly assembled into one ceramic base plate, so that assembly and disassembly is very simple.

Dimensions: 27.0mm x

Thickness: 22.6mm

Thickness: 9.04mm
