
Module No.1799

TO SET TIME

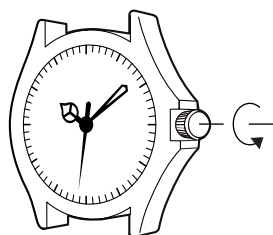

Pull the crown out. Set the hands by turning the crown in either direction. Push the crown in on a time signal.

■ For watch with the elapsed time bezel

Rotate the elapsed time bezel to align the ▼ mark with the minute hand.

After certain amount of time elapsed, read the graduation on the elapsed time bezel which the minute hand points to. The elapsed time is indicated.

- Some water resistant models are equipped with a screw lock crown.
- With such models, you must unscrew the crown in the direction noted in the illustration to loosen it before you can pull it out. Do not pull too forcibly on such crowns.
- Also note that such watches are not water resistant while their crowns are loosened. Be sure to screw the crowns back in as far as they will go after making any setting.
