

Instruction Manual

LORUS

ANALOGUE QUARTZ

LORUS

■ HOW TO USE NON - CALENDAR MODEL

Pull the crown OUT to the FIRST click and set the time. Then push the crown IN.

Note: When you set the time, first set the minute hand to a properly advanced time, then return the minute hand to the correct time by turning it COUNTERCLOCKWISE.

■ HOW TO USE DAY/DATE MODEL

The day of the week can be displayed bilingually (English/another language) and you can select either.

1. How to set the day and date

Pull out the crown to the first click position. (The crown of this watch can be pulled out to the second click position.)

Turn the crown and set the previous day and date. (The day and date can be selected alternatively and displayed in English or the other language.) (For Cal. PC33, turn clockwise to set the date only.)

Pull out the crown to the second click position and set the present day and date by turning the minute hand.

Day setting for Cal. PC33

At the second click position, turn the hands clockwise and counterclockwise repeatedly between 11:15 pm and 3:45 am to select the desired day and language.

Note: Do not attempt to set the day and date between the times of 9:00 pm and 4:00 am as this may cause the day and date displays to change out of sequence.

2. How to set the time

Pull out the crown to the second click position and the second hand stops. The second hand should be stopped on 12 o'clock position.

Turn the crown and set the desired time.

Push the crown into the normal position in accordance with a time signal.

- Be sure to check that the AM/PM is correctly set. (The day and date are designed to change once every 24 hours.)
- To adjust the correct time for a quartz watch, it is necessary to advance the minute hand 4 or 5 minutes ahead of the correct time and then turn it counterclockwise to set the designated time.

■ LUMIBRITE WATCH

* If your watch is a LORUS LUMIBRITE watch, it has following features.

LORUS LUMIBRITE watches absorb and store light energy from natural and artificial light sources and emit light in the dark. They are made of environmentally friendly material, and therefore, are harmless to human beings and the environment.

- With a full charge, LORUS LUMIBRITE watches glow in the dark hours longer than conventional luminous watches of this type. If exposed to a light of more than 500 lux (i.e., the brightness of a typical office) for approximately 10 minutes, or direct sunlight for 2 minutes, they will glow for hours.
- Since LORUS LUMIBRITE watches emit the light they store, the brightness will decrease gradually over time. The length of time they will glow may also differ slightly depending on such factors as the brightness of and distance from the light source used to charge the watch.

■ BATTERY CHANGE

As the battery is inserted at the factory to check the function and performance of the watch, its actual life once in your possession may be less than the specified period.

Be sure to replace the battery to prevent any possible malfunction as soon as it runs down.

CAUTION

To replace the batteries, we recommend taking the watch to a local watch repair shop.

Do not expose the old battery to fire or recharge it.

■ CARE OF YOUR LORUS WATCH

WARNING

Please note that there is a risk of serious consequences such as severe injury if the following safety regulations are not strictly observed.

- **Immediately stop wearing the watch in following cases.**
 - If the watch body or band becomes edged by corrosion etc.
 - If the pins protrude from the band.
- ✱ Immediately consult the retailer from whom the watch was purchased or LORUS SERVICE NETWORK.
- **Keep the watch and accessories out of the reach of babies and children.**
 - Care should be taken to prevent a baby or a child accidentally swallowing the accessories.
 - If a baby or child swallows the battery or accessories, immediately consult a doctor, as it will be harmful to the health of the baby or child.
 - DEATH or serious injury can occur if ingested.
 - A swallowed button cell or coin battery can cause Internal Chemical Burns in as little as 2 hours.

• WATER RESISTANT

Condition of use Indication on the dial/ case back	Accidental contact with water, such as splashes and rain	Swimming and taking a shower	Skin diving	Scuba diving
No Indication	NO	NO	NO	NO
WATER RESISTANT	YES	NO	NO	NO
WATER RESISTANT (50M/5 BAR)	YES	YES	NO	NO
WATER RESISTANT (100M/10 BAR or above)	YES	YES	YES	NO

* If your watch is 200 M/20 BAR, 100 M/10 BAR or 50 M/5 BAR water resistant, it is so indicated on the dial/case back.

CAUTION

- **Do not operate the buttons when the watch is wet.**
- **If the watch is exposed to salt water, rinse it in fresh water and then wipe it thoroughly dry.**
- **Should you find any water or condensation inside the watch, immediately have it checked. Water can corrode electric parts inside the case.**

CAUTION

This watch contains precise electronic components. Never attempt to open the case or remove the back cover.

- **LEATHER BAND**
 - A leather band is susceptible to discoloration and deterioration from moisture, sweat and direct sunlight.
 - Wipe off moisture and sweat as soon as possible by gently blotting them up with a dry cloth.
 - Do not expose the watch to direct sunlight for a long time.
 - Please take care when wearing a watch with light-colored band, as dirt is likely to show up.
 - Refrain from wearing a leather band watch other than Aqua Free bands while bathing, swimming, and when working with water even if the watch itself is water-resistant enforced for daily use (10-BAR/20-BAR water resistant).
- **PLASTIC BAND**
 - As for material characteristics, the band is easily dirtied, and may be stained and discolored. Wipe off dirt with a wet cloth or cleaning tissue.
 - Unlike bands of other materials, cracks may result in the band being cut. Take care not to damage the band with an edged tool.

• ALLERGIC REACTION

Because the case and band touch the skin directly, it is important to clean them regularly. If not, shirt sleeves may be stained and those with delicate skin may develop a rash. Please wear the watch with some play to avoid any possible allergic reaction. If you develop a rash on your wrist, stop wearing and consult a physician.

• MAGNETISM

Your watch will be adversely affected by strong magnetism. Keep it away from close contact with magnetic objects.

• SHOCKS AND VIBRATIONS

Your watch may be worn for normal sports activities, but be careful not to drop it or hit it on hard surfaces.

• TEMPERATURE

Your watch is preadjusted so that constant accuracy may be insured at normal temperature.

• CLEANING

Use only a soft cloth and clean water for cleaning your watch. Never use chemicals, as the waterproof gasket will corrode.

■ SERVICE

When your LORUS watch requires repair or servicing, please see the enclosed WARRANTY/GUARANTEE.

■ HOW TO ADJUST BAND LENGTH

Sliding clasp band

1. Pry up the adjusting flap with a small screwdriver or something with a sharpened tip.
2. Slide the clasp to adjust it to a desired size.
3. The grooves on the Back side of the bracelet should fit into the convex portion on the clasp, then, close the adjust flap.

● Wrong method

If you do this way, the adjusting flap may be destroyed.
